

Cracking wind drifts on Mt Blackmore

Mt Blackmore
Northern Gallatin
1/22/2019
Code
Latitude
45.44410
Longitude
-111.00300
Notes

From an email, " Over a foot of new snow up high with consistent NW winds. Soft slabs where breaking anywhere from several inches midslope to a foot deep along ridgelines on a mid-storm density change in the newest snow. We experienced cracking along ridgelines, but no collapsing while skinning in the trees or near the ridge."
