

Ice climber hit by loose snow avalanche on Killer Pillar, Hyalite

Flanders Creek
Northern Gallatin
12/31/2019
Code
L-N
Aspect
NE
Latitude
45.44020
Longitude
-110.93100
Notes

From an email:

"Got hit by a pretty decent [loose snow avalanche](#) from above while topping out on Killer Pillar up Flanders. Had a decent stance so I was able to hold on. Also observed more than a few coming down gullies on the other side of the drainage. It was lightly snowing all day and dead calm in the drainage, so presumably winds were cranking on the ridgetop."
