

Bacon Rind

Date

Thu, 01/28/2021 - 14:37

Activity

Skiing

Today we enjoyed some low angle meadow skipping up bacon rind. We found 12-14 inches of new, moderate density snow. We observed cracking and whumpfs in more sheltered areas where that SH layer was well preserved. On the ridge, wind was moderate to strong out of the SSW and associated blowing snow was moderate to intense as well.

Region

Southern Madison

Location (from list)

Bacon Rind
