

Big Horn Peak

Date

Mon, 02/01/2021 - 17:32

Activity

Skiing

Skied up near Big Horn Peak today, found good boot top pow up high, around 100cm HS, a bit unsupportable and thin down low. Got lots of whumphs, probably 20+. Saw an avalanche on the west face of Meldrum, looked to be a few days old, but probably R2D2. I've attached a photo.

Hopefully this snow keeps up!

Spencer

Region

Southern Gallatin

Location (from list)

Specimen Creek
