

Lewis creek

Date

Sat, 03/13/2021 - 08:00

Activity

Snowboarding

Went for a hike on a ridge line between Lewis creek and mill for hyalite creek. Saw the avalanche on a south/south east facing aspect around 9500'. I didn't see how far it ran, but last year it broke loose and took out a lot of trees(video). Hard to tell how deep it broke but it broke pretty wide.

Region

Northern Gallatin

Observer Name

Elton
