Yesterday I witnessed a big wet slide. It started on the exit from The Fin on Old Man Rays. Looks like it started on a rock band. Noon. Since people have been skiing The Fin recently I just happened to be looking up there and saw movement. It quickly quadrupled and then flowed across the ski line and over the cliff band. Spectacular. Flowed like a water fall for about a minute. Should be some more activity today.

Region

Cooke City

Location (from list)

Republic Mountain

Observer Name

Steve Dober
