

West Ridge of East Fork -NE Aspect 8000 feet - High Fidelity

Date

Sun, 12/12/2021 - 09:25

Activity

Ice Climbing

Shooting cracks and whoomphing in wind loaded areas. An approximately 15x30ft wind slab cracked along the base of a rock band and settled at the base of P2 on high fidelity. Was triggered while traversing along the rock band to gain the second pitch, 1-2 inches of facets on the ground. Wind slab of 6-36in in the gullies.

Region

Northern Gallatin

Location (from list)

Hyalite - East Fork

Observer Name

Matthew Hearley
