## **Natural Avalanche Henderson Mountain**

Henderson Mountain Cooke City 11/13/2022 Code SS-N-R2-D2-U Elevation 10000 Aspect NE Latitude 45.05240 Longitude -109.94500 Notes

From email: "We noted one recent <u>slab</u> avalanche today on a NE <u>aspect</u> of Mt. Henderson, around 10,000. We were skiing nearby on Nov. 11-12 and did not notice this <u>slide</u>, but that may have simply missed it (that slope becomes shaded by about noon this time of year and there was lots of wind affected snow in that area.)"
