

Small wind slab slide on Elephant Mountain

Date

Thu, 01/12/2023 - 13:00

Activity

Skiing

Started a small wind slab avalanche on an isolated rollover about 2/3 of the way down the face of elephant mountain yesterday (Thursday January 12th). Broke a few inches deep, about 8 feet wide, and ran less than 100 ft.

Region

Northern Gallatin

Location (from list)

Elephant Mountain

Observer Name

Trevor grab
