

Deep snow and whumpf in Lick Creek

Date

Tue, 02/14/2023 - 11:40

Activity

Skiing

Just a little more than 4-7" snow in Hyalite this morning

I skied at Lick Creek area and there's 18-24" and still dumping

Low density

In the meadows I skied (not the Main meadow - too far to break trail 😂) snow is on pretty firm melt / freeze crust. Heard a few whumps skinning up

Region

Northern Gallatin

Location (from list)

Lick Creek
