

## Skier triggered slide in Beehive

Beehive Basin

Northern Madison

2/14/2023

Code

SS-ASu-R1-D1

Elevation

8700

Aspect

SW

Latitude

45.34070

Longitude

-111.39100

Notes

In Beehive with AAI Pro 1. Storm snow measured at over 30 cm, roughly double what was reported at Big Sky/YC. 5% density. Wind Slabs slowly building from L to M N winds, both WS and Loose Dry touchy on all slopes steeper than 35 with a MFcr as the interface - basically everything W, S, E aspects below 9500 (probably above too but we didn't go that high). One skier triggered [wind slab](#) observed low in the "tyler's" [slide](#) path on a SW [aspect](#), 8700 ft, 35 deg, SS-ASu-R1/D1-I. No evidence of active persistent [slab](#), 11x pits @ 8500 SE, HS 170, ECTX for all.

Number of slides

1

Number caught

0
