

Miller Ridge avalanche

Date

Thu, 03/16/2023 - 01:20

Activity

Skiing

Saw this natural D2 soft [slab](#) off the east [aspect](#) of Miller Ridge. The crown looks shallow, so I'm guessing it ran at the storm interface.

No other avalanches or signs of instability observed. Winds were light out of the NW and the HN of the settled snow was about 10cm.

Region

Cooke City

Location (from list)

Miller Ridge

Observer Name

Nina Hance
