Several large wet slides in north bowl

Bridger Bowl Bridger Range 4/28/2023 Code WL-N-R3-D2.5 Elevation 8000 Aspect E Latitude 45.81560

Notes

Longitude -110.92300

Pictures from this morning (May 1) but I'm sure these all ran late last week. They took out at least one or two skin tracks set during the big dump (40") that ran right up the center.

Unconsolidated, dripping wet snow this morning mid mountain around 830 AM. Top 3-4" had frozen but soft by 830.
