Code

Latitude

45.03030

Longitude

-109.99800

Notes

From obs: "While transitioning at the top of mineral mountain burn, a member of our party stepped away from our packed out transition spot and likely the deeper impact from his ski boots triggered the [weak layer](#) beneath us and created a massive whumf that propagated hundreds of feet and was strong enough to knock snow off of nearby trees. Nothing we observed slid but the [collapse](#) was extremely evident."
