

"Skier triggered Pocket in super couloir. Wasn't very unexpected, the skier's left side felt a little slabby than the skier's right and tried to stay off. Triggered going over a sharky rock spot, not very fast moving and easy to ski out of. Snow depth was 2-2.5 feet." Photo: Anonymous

Advisory Region
Bridger Range
Longitude
-110.92W

Latitude

45.82N
