

Beehive basin

Date

Tue, 11/19/2024 - 03:35

Activity

Skiing

Two obvious layers. sun crust layer with a foot of wind blown on top. top layer failed while isolating column for pit test. photos are from a video that i cannot attach. it just shows the two layers. i tried to preform the test to the left but it failed prior to any taps.

Region

Northern Gallatin

Location (from list)

Beehive Basin
