Code

Latitude

44.72920

Longitude

-111.32300

Notes

Toured into the southern Lionhead today. Yesterday's warm weather made the snowpack more moist, and the upper snowpack was much more cohesive than in days past. Snow was glopping on skis and skins up to around 9k. I got on NE, E, and SE aspects, which were quite reactive, with more wumpfs than in the last few days.
